Program Completion Rates

CCNE Standard IV-B: Program completion rates demonstrate program effectiveness

Program Benchmark:

The completion rate is 70% or higher for the most recent calendar year (January 1-December 31) when excluding students who have identified factors such as family obligations, relocation, financial barriers, and decisions to change major or to transfer to another institution of higher institution. The goal is program completion within a 3-year time frame.

Formula for calculating completion rate: Number of students admitted in a calendar year (January 1-December 31) who complete the program within 3 years divided by the total number of students admitted in a calendar year (excluding non-academic withdrawals). The "n" number can change depending upon the number of non-academic withdrawals.

Calendar year of	Year of admission	Program completion rate (excluding family obligations, financial,	Benchmark met?
